SUMMARY

I'm a junior Developer aspiring to enter the work of a mid-senior engineer and go up the ranks up to principal engineer in future

PERSONAL SKILLS

Web (html5, css3, Sql, JavaScript)

React.js

Redux

Ruby and Ruby on rails

Currently Learning Node.js

PROJECT SUMMARY

I participated in group project at Moringa School. The project was a restaurant booking web app called **BUK-A-MEAL** we were able to create the app and it had two users the admin and the users. The admin was able to add meals to the app and also set specific days the meals were offered. And the user can login to the app and make an order of his favorite meal. We used react.js for the frontend and ruby on rails for the backend and later on hosted our app using vercel

Here is the live link to the project: http://buk-a-meal-frontend.vercel.app/

The GitHub links for frontend: https://github.com/Alexkimathi/buk-a-meal-frontend

The GitHub links for backend: https://github.com/Alexkimathi/buk-a-meal-backend
